Особенности поисковой системы ScienceDirect

Поисковый запрос на английском языке!

- Можно использовать как строчные, так и прописные буквы
- При поиске существительных в единственном числе поиск будет проводиться также по этим существительным во множественном числе
- При использовании нескольких слов, разделенных пробелами, будут найдены документы или изображения, содержащие указанные слова (AND)
- Для поиска фраз необходимо использовать кавычки или фигурные скобки

Логические операторы и операторы близости

- AND
- OR
- AND NOT

(«heart attack» OR «myocardial infarction») AND diabetes AND NOT cancer

- **W/n** ограничивает поиск, задавая максимальное расстояние между двумя словами (не более n слов между словами в поисковом запросе). Порядок слов не имеет значения.

Pain w/5 morphine отобразит документы, в которых слово pain находится в пределах 5 слов от слова morphine

- **PRE/n** ограничивает поиск, задавая максимальное количество слов, которые могут находиться между двумя указанными словами. Порядок слов имеет значение. Первое слово должно идти до второго, причем между ними должно быть не более указанного количества слов (n).

Newborn PRE/3 screening отобразит документы, в которых слово screening находится до слова Newborn, а также в которых между указанными словами находится не более 3 слов.

- **()** Порядок выполнения запроса или использование более одного оператора в поисковых запросах

(heart w/2 attack) OR coronary

Volume(s)/Issue(s)/Page(s)

Поиск по датам и диапазонам

- 1995 или 1995-2018
- -без пробела1-25

Особенности записи символов

- Греческие буквы

Ω написать **omega**

Будут найдены документы со словом и символом Ω и ω

- Надстрочные и подстрочные индексы

H_2O написать **H2O**

- Для поиска автора **Fürst**
написать **Fürst** или **Furst**

- Abstract:** The abstract text begins with 'Background Silent events with newly developed Q waves in electrocardiogram (ECG) [silent myocardial infarction (MI)] in diabetic patients is reported to be independently associated with an increased risk of fatal MI. However, the incidence rate of silent MI in diabetic patients has yet to be clarified. We sought to determine the incidence rate of first symptomatic MI and silent MI in diabetic patients. Methods We conducted a prospective cohort study on patients enrolled in the Japanese primary'.
